

The Heating Cabinet-85

Designed for the storage of electrodes, preventing moisture pick-up and deterioration.

A thermostat allows for stepless setting of the temperature from 30 °C up to 85 °C (86 °F up to 185 °F).

The heating cabinet contains five shelves that are slanted. Each shelf is removable.

The active parts in this oven are enclosed in a unit located in the bottom of the oven. This unit can be easily removed as one unit.

The heating cabinet has 100 mm mineral wool in the bottom and 50 mm in the top and side walls. It has a simple yet rugged construction, and can be transported by fork lift truck.

Caution:

Use gloves when handling warm electrodes from inside the heating cabinet. No chemical products are to be used within the heating cabinet.

Type	Mains Voltage V	Heater Output W	Primary Current A	Operating Temperature °C	Width x Depth x Height		Electrode Capacity kg	Net Weight kg
					Inner Dimensions mm	Outer Dimensions mm		
Heating Cabinet-85	230, 50/60 Hz	500	1,3	30-85	460 x 520 x 860	564 x 640 x 1095	350	70
