

Navigate compliance with confidence

As emissions regulations become more stringent, and Emission Control Areas (ECAs) expand, we help to ensure you remain compliant.

Staying ahead means adopting proven solutions that keep pace with evolving standards. Wilhelmsen Ships Service provides effective emission control solutions to reduce Nitrogen Oxide (NOx) and Sulphur Oxide (SOx) emissions in marine engines, ensuring adherence to MARPOL Annex VI regulations, including IMO Tier III for NOx emissions.

Our range of emission control chemicals

Product number:
912001

High-purity 40% aqueous urea solution for reducing NOx emissions in SCR systems

ISO 18611 compliant, meeting manufacturer requirements

Proven 90-95% NOx reduction

High quality caustic soda solution with flexible concentrations (20-50%)

ASTM E291-18

Safe, efficient neutralization of SOx through exhaust gas cleaning systems (scrubbers)

Product number:
912012

Flexible delivery options to seamlessly bring the product to the vessel

Benefits of partnering with Wilhelmsen Ships Service

Competitive Pricing

Attractive all-inclusive rates with barging and pumping, where possible

Timely Response

Prompt and proactive support to address your needs

Global Reach

Extensive network for reliable deliveries worldwide

Trusted Quality

NOx – IMO Tier III compliant (ISO 18611 standard)
SOx – ASTM E291-18 Compliant

Unparalleled Delivery Experience

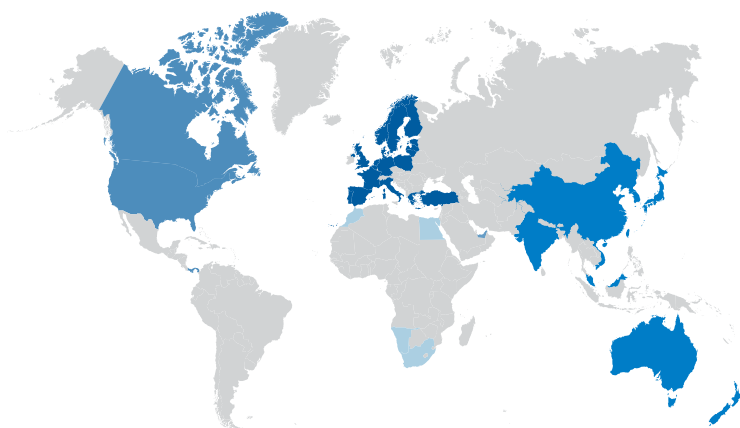

Seamless last-mile-delivery service for peace of mind

Convenience

One stop shop for all your chemical needs
